AVONIC

LOW LATENCY CAMERAS & VIDEO RECORDING FOR CONFERENCING

Seamlessly integrated & High-quality solution

Avonic and ARBOR deliver a high-quality solution consisting of ARBOR easy to use video recording and streaming software together with Avonic PTZ cameras. Seamlessly integrated with the Arbor video recording and archiving system, to record video & audio of all delegates, capture their video images and record the original audio and video interpretations.

Low Latency PTZ cameras

Well known for its low latency implementation, Avonic cameras support both low-latency IP streaming and 3G-SDI/HDMI outputs enabling room real-time viewing. Field-proven reliability and performance combined with silent operation. Designed with conferencing in mind, blending into the environment.

State-of-the-art government solutions

Avonic and Arbor provide efficient, user-friendly, state-of-the-art solutions to parliaments, court rooms, broadcast stations and other professional organizations.
